+7-(926)-855-58-54

## Desired position

- Intern/junior python developer
- Full time during the holidays and part time during university studies

## Skills

- Algorithms and data structures

## Pet projects

*Using neural networks for symbolic counting of derived functions* – in progress

Link - <https://github.com/MeTheBirb/differentiation>

The link above contains a program that symbolically calculates the derivatives of functions and will be used as a teacher for a neural network in the future.

## Education

September 2020 - Present

National research university MIPT  
Bachelor – quantum electronics

## About me

I studied in an advanced algorithms group at MIPT using python, familiar with c++ syntax.  
Interested in python development and machine learning.  
I am striving to gain new knowledge and skills and ready to work for this
